

# TOP AI-POWERED EHR SOFTWARE

---

## AI FUNCTIONALITY ACROSS TOP EHR PLATFORMS

### 1 Oracle Health EHR

- **AI clinical assistant:** Conversational, voice-driven AI that automates clinical documentation and provides real-time clinical insights.
- **Semantic AI foundation:** Uses AI to understand clinical meaning for more accurate insights, such as linking medications to conditions.
- **Financial automation:** Features intelligent automation and generative AI for revenue cycle management and other financial operations.

### 2 Epic EHR

- **Charting:** Developed in partnership with Microsoft, this feature transcribes patient-physician conversations to draft clinical notes.
- **Clinician-facing AI "Art":** This tool anticipates visit needs, creates tailored patient summaries, and automates downstream workflows like placing orders.
- **Patient-facing AI "Emmie":** Explains medical information to patients in plain language, answers questions, and can help with tasks like scheduling.
- **RCM assistant "Penny":** AI revenue cycle management tools like autonomous coding and billing follow-up.

### 3 Elation Unified EHR & Billing System

- **Note assist and Actions:** Features AI to enhance documentation and automate tasks, like drafting post-visit communications.
- **AI-Enhanced clinical forms:** Turns intake templates into digital experiences for better patient interaction.
- **Clinical insights:** Context-aware patient summaries to aid clinical decision-making.

### 4 Azalea Health EHR

- **Clinical assistant (powered by Suki):** An ambient AI scribe solution that uses voice to generate structured clinical notes from provider-patient conversations.
- **Billing assistant:** Simplifies claims management by flagging potential coding issues and automating repetitive tasks.
- **Agentic AI architecture:** Built to support evolving AI technology capabilities.

## 5 eClinicalWorks EHR

- **Sunoh.ai:** A multilingual (English, Spanish, and Portuguese) ambient AI medical scribe that automatically generates SOAP notes and other orders from conversations.
- **RCM:** Streamlines billing processes with AI-driven insurance eligibility checks, EOB conversions, and denial appeal letter generation.
- **Value-based care:** Provides scorecards to measure progress on value-based care goals.

## 6 Praxis EMR

- **Concept processing AI:** A template-free AI engine that learns and adapts to a provider's unique style of charting and writing.
- **Intelligent agents:** Automated communication modules for reminders and patient engagement.
- **Proprietary query engine:** Allows users to build and run queries on clinical data without technical expertise.

## 7 Tebra

- **Note assist:** Listens to/transcribes patient conversations, creating structured clinical notes and suggesting relevant ICD-10 codes.
- **Automated billing and Payments:** Uses machine learning to streamline billing and payment workflows for independent practices.
- **Predictive analytics:** Helps healthcare professionals with proactive decision-making.

## 8 CarePaths EHR

- **Clinical insights:** Provides real-time, actionable insights by analyzing patient records and treatment plans.
- **Auto-generated clinical summaries:** Creates chronological event timelines and summaries of patient progress.
- **Predictive insights:** Uses models to forecast outcomes, identify risk factors, and suggest treatment optimizations based on patient data.

## 9 ModMed EMA

- **Adaptive learning engine:** Learns and adapts to a physician's charting preferences to suggest diagnoses, treatments, and procedures, eliminating the need for manual templates.
- **ModMed Scribe:** An ambient AI listening tool that works with the EHR to create clinical documentation and automate downstream tasks like common lab orders.
- **AI-powered faxing:** Automatically categorizes and files faxes and pre-populates key data fields to reduce administrative burden.

## 10 CentralReach

- **cari (specialized AI agent):** Designed for autism and intellectual/developmental disability (IDD) care. Audits clinical notes and claims, and creates session summaries.
- **Scheduling:** Reduces scheduling time and helps manage changes with ease.
- **Integrations:** Works with third-party AI scribes like ScribeHealth AI for automated, HIPAA-compliant documentation.

## 11 AthenaOne EHR

- **Voice assistant:** AI-backed voice assistant technology developed with Nuance to boost documentation accuracy and reduce time spent on administrative tasks.
- **Generative AI huddle reports:** Provides care managers with AI-generated reports to prepare for weekly care meetings with providers.

## 12 TheraPlatform

- **AI notes add-on:** Includes text-to-text generation, AI dictation, and the ability to create structured clinical documentation from telehealth sessions.
- **Automated outcome measures scoring:** Automatically scores standardized assessments to save time and track client progress.
- All AI note features are built with end-to-end encryption and do not use customer data for training.

## 13 Veradigm EHR

- **NLP-driven insights:** Uses natural language processing (NLP) to extract insights from unstructured EHR data, such as clinician notes, to analyze real-world data at scale.
- **Discontinuation drivers:** Automatically extracts reasons for stopping therapy from clinical notes.
- **Outcomes and behavioral context tracking:** Detects side effects, flags off-brand use of medications, and surfaces social determinants of health (SDoH) from clinical notes.
- **Predictive scheduler:** Forecasts patient demand and creates a prioritized schedule.

## 14 AdvancedEHR

- **Ambient listening:** Captures clinical conversations to create documentation automatically, allowing providers to focus on patients.
- **Prior authorization and coding automation:** Features AI-driven workflows to streamline prior authorizations and computer-assisted coding.
- **Patient intake automation:** Creates frictionless patient intake experiences by automating manual data entry for both patients and staff.

## 15 PrognoCIS (PrognoAI)

- **Chat assistance:** An AI-driven chat function that answers queries in-platform for quick reference.
- **PrognoAI-Scribe:** Creates an editable transcript of provider-patient conversations, aiding in more accurate diagnoses.
- **Health summary notes:** Summarizes the last five visit notes for quick review

## SHORTLISTING EHR VENDORS CHECKLIST

<p>1 <input type="radio"/> Research EHR employed by similar sized practices in the same specialty</p> <p>2 <input type="radio"/> Identify market leading solutions which offer some support in your specialty</p> <p>3 <input type="radio"/> Leverage professional network for recommendations based on their experience</p> <p>4 <input type="radio"/> Identify any specialty-specific EHRs</p> <p>5 <input type="radio"/> Compile initial shortlist of vendors</p>	<p>6 <input type="radio"/> Produce an RFI document and send to vendor shortlist</p> <p>7 <input type="radio"/> Narrow shortlist based on RFI responses</p> <p>8 <input type="radio"/> Compile requirements and business processes in an RFP document</p> <p>9 <input type="radio"/> Narrow shortlist based on RFP responses to produce final shortlist</p>
--	--

## SENDING EHR RFP CHECKLIST

Provide practice background

Provide project background - why are you selecting a new EHR?

Provide in-depth, end-to-end timeline for EHR selection and implementation

Outline all EHR requirements and their priority

Request at least three references from practices similar to your own

Request information on vendor implementation team personnel and their experience

Provide a deadline for RFP responses and information on when you'll be in contact

Send out RFP to EHR vendor shortlist

## WHY NOT CREATE YOUR OWN COMPARISON?

With our free comparison engine you can build your own side-by-side comparison of leading EHR solutions. Narrow down your shortlist using filters including:

- Software Features
- Delivery Platform
- Practice Size

**FIND & COMPARE EHR**

The image shows a laptop screen displaying the EHR in Practice website. The page is titled 'Find & Compare EHR Software' and features a comparison between two EHR solutions: CareCloud Charts and AdvancedEHR. The CareCloud Charts section includes a 'SELECTED' checkbox and a 'COMPARE NOW' button. The AdvancedEHR section includes a 'COMPARE' button. To the right of the comparison table, there is a 'FILTER BY...' sidebar with dropdown menus for 'Search...', 'Sort By', 'Software Features', 'Practice Size', 'Specialty', and 'Delivery Platform'. The top navigation bar of the website includes links for 'IMPLEMENTATION', 'SELECTION', 'STRATEGY', 'NEWS', 'SPECIALTY', 'TOOLS', 'WHITE PAPERS', and 'FIND EHR'.
